

Shubham Bhardwaj

Software Engineer

shubham1089@gmail.com • 6048169957
[LinkedIn](#) • Vancouver, Canada V6E 1S4

Innovative professional with progressive experience in full-stack development. Well-versed in designing, creating, testing software applications using advanced programming languages. Highly skilled in overseeing software development lifecycle including requirements analysis, design, coding, testing, deployment, and maintenance. Talent for quickly learning new skills and information. Competent at managing projects within budget and time constraints. Ability to work on both front-end and back-end systems and collaborate with design, product, and QA teams to deliver scalable and secure solutions.

Technical Skills

Frameworks: React, Redux, Bootstrap, Jest, jQuery, Angular 4, React Native, Agile (Scrum)

Tools: NPM, AWS, Visual Studio Code, Git, Chrome Dev Tools, Webpack, Postman

Languages: JavaScript, Python, Go, HTML5, CSS3, SASS, Java, MySQL

Professional Experience

Amazon Web Services, Seattle, Washington Software Development Engineer

August 2021 – Present

Direct agile practices as scrum master, advancing backlog refinement, customer request prioritization, and coordination of monthly newsletters. Elevate UX consistency and increased user satisfaction by upgrading frontend interfaces with React and AWS design system. Conduct code reviews, debugging, and unit assessment to raise software quality and reliability. Collaborate with product managers, designers, and other engineers to understand requirements and deliver solutions.

- Achieved zero-downtime updates by engineering and deploying a rolling update mechanism for GPU clusters. Increased customer satisfaction & enabled get a new customer with demo of this feature.
- Minimized manual intervention by 60%; built Python-based automation tools for network infrastructure deployment.
- Improved latency by 90% and strengthened customer retention by converting legacy Django applications to a React + Python architecture, overseeing full lifecycle from design to deployment.

Publicis Sapient, Gurgaon, India Associate Experience Technology Level 1

June 2018 – July 2019

Ensured consistent sprint delivery by planning deployments and managing sprint activities as sole front-end developer. Expedited project delivery and streamlined CI/CD integration by executing time-sensitive project stories across UI teams. Provided technical support to end-users, including troubleshooting hardware, software, and platform issues. Contributed to continuous improvement initiatives by providing feedback on technology usability and functionality.

- Enhanced code maintainability and development by 30% through creation of reusable React UI components.
- Eliminated technical debt within single sprint via focused remediation and optimization efforts.
- Increased order creation by 10% through optimization of add-to-bag functionality.

Additional Experience

Junior Associate Experience Technology, Publicis Sapient, Gurgaon, India, January – June 2018

- Exceeded delivery targets and increased code maintainability by guiding four interns on an industrial project.
- Selected by peers as team lead, driving project success and strengthening team collaboration.

Web Development Intern, Free Doctor Helpline Private Limited, New Delhi, India, June – July 2017

- Boosted booking success rates by 40% through formulation of AngularJS-based appointment booking system.
- Enhanced intern productivity and on-time module delivery by guiding training on frontend technologies.

Education

Master of Science in Software Engineering

Arizona State University, Tempe, AZ, May 2021; GPA: 3.93/4

Bachelor of Technology in Computer Science Engineering

Manipal University Jaipur, Jaipur, India, July 2018; GPA 7.6/10 (3.25/4.0)

Academic Projects

Kid Investor, Spring 2021

- Rolled out frontend using React/Redux, mentoring team members to ensure project completion.
- Conducted regular customer meetings for feedback and progress updates.

Visual Maths, Fall 2019

- Developed gamified learning app for primary school students in Unity Engine
- Worked as scrum master to gain project milestones.

Battleship Bot, Fall 2017

- Researched existing algorithms for optimal shooting system to devise a probabilistic targeting algorithm, improving bot hit accuracy by 35%.
- Completed project within timeframe despite losing team member early in project stages.
