

Shubham Bhardwaj

Software Engineer

shubham1089@gmail.com • 6048169957
[LinkedIn](#) • Vancouver, Canada V6E 1S4

Full-stack software engineer with 5+ years of experience designing distributed systems, cloud infrastructure, and end-to-end product features at scale. Proven ability to own complex projects from design through production launch spanning backend services, frontend applications, and ML platform tooling. Seeking full-stack or backend-heavy engineering roles at companies solving hard technical problems.

Technical Skills

Languages: Python, Java, TypeScript, Go, JavaScript, SQL

Infrastructure: AWS, CDK, CloudFormation, CI/CD Pipelines, REST APIs

Frontend: React, Redux, Angular, Jest, HTML5, CSS3

Tools: Git, Docker, Integration Testing

Professional Experience

Amazon, Vancouver, Canada
Software Development Engineer

August 2021 – Present

Full-stack engineer on Amazon Custom (seller configuration platform) and AWS SageMaker (managed GPU cluster infrastructure) and AWS Networking (builder tools). Own projects end-to-end from design through production launch.

- Designed a partial patching system with configurable failure thresholds for 1000+ node GPU clusters, eliminating full-cluster rollbacks and unblocking security patching cadence.
- Engineered a rolling update mechanism that patches GPU clusters in batches, achieving zero-downtime updates for customer training workloads.
- Led multi-region migration of a Lambda service, solving 3 novel DynamoDB Global Table race conditions through a single-region-active architecture with operational failover.
- Built an AI oncall assistant (Bedrock KB, 500+ indexed incidents) that triages tickets, matches runbooks, and generates shift summaries.
- Reduced manual intervention by 60% by building Python automation tools for network infrastructure deployment.
- Improved latency by 90% by migrating legacy Django services to React + Python with optimized REST APIs.

Publicis Sapient, Gurgaon, India
Associate Experience Technology Level 1

June 2018 – July 2019

Grew from the junior most dev on an e-commerce platform to being the sole frontend dev of a fintech platform, owning sprint planning, deployments, and CI/CD integration across UI teams.

- Increased order creation by 10% through optimization of add-to-bag functionality.
- Enhanced code maintainability by 30% through creation of reusable React UI components.
- Eliminated a sprint's worth of technical debt via focused remediation and optimization.

Additional Experience

Junior Associate Experience Technology, Publicis Sapient, Gurgaon, India, January – June 2018

Led a team of 4 on an industrial project, exceeding delivery targets and selected as team lead by peers.

Web Development Intern, Free Doctor Helpline Private Limited, New Delhi, India, June – July 2017
Built an AngularJS appointment booking system, increasing booking success rates by 40%.

Education

Master of Science in Software Engineering

Arizona State University, Tempe, AZ, May 2021

GPA: 3.93/4

Bachelor of Technology in Computer Science Engineering

Manipal University Jaipur, Jaipur, India, July 2018

GPA 7.6/10

Academic Projects

Kid Investor, Spring 2021

Rolled out frontend using React/Redux, mentoring team members to ensure project completion and conducted regular customer meetings for feedback and progress updates.

Visual Maths, Fall 2019

Developed gamified learning app for primary school students in Unity Engine. Worked as scrum master to gain project milestones.

Battleship Bot, Fall 2017

Researched existing algorithms for optimal shooting system to devise a probabilistic targeting algorithm, improving bot hit accuracy by 35%
