

Shubham Bhardwaj

Software Engineer

shubham1089@gmail.com • 6048169957
[LinkedIn](#) • Vancouver, Canada V6E 1S4

Full-stack Software Engineer with 5+ years of experience building scalable frontend platforms, cloud infrastructure tools, and distributed systems. Strong background in React, TypeScript, AWS, and developer productivity, with experience owning features end-to-end from design and architecture to production launch.

Technical Skills

Languages: Python, Java, TypeScript, Go, JavaScript, SQL

Infrastructure: AWS, CDK, CloudFormation, CI/CD Pipelines, REST APIs

Frontend: React, Redux, Angular, Jest, HTML5, CSS3

Backend: REST APIs, Jest, Spring Boot, Node.js

Tools: Git, Docker, Figma, Postman

Professional Experience

Amazon, Vancouver, Canada

August 2021 – Present

Software Development Engineer

Full-stack engineer across Amazon Custom, AWS SageMaker managed GPU cluster infrastructure, and AWS Networking builder tools. Own projects end-to-end from design and architecture through production launch.

- Designed a partial patching system with configurable failure thresholds for 1000+ node GPU clusters, eliminating full-cluster rollbacks and unblocking security patching cadence.
- Engineered a rolling update mechanism that patches GPU clusters in batches, enabling zero-downtime updates for customer training workloads.
- Led multi-region migration of a Lambda service, resolving 3 novel DynamoDB Global Table race conditions through a single-region-active architecture with operational failover.
- Built an AI on-call assistant using Bedrock Knowledge Bases and 500+ indexed incidents to triage tickets, match runbooks, and generate shift summaries, reducing triage time by 80%.
- Reduced manual intervention by 60% by building Python automation tools for network infrastructure deployments.
- Improved latency by 90% by migrating legacy Django services to React + Python with optimized REST APIs.

Publicis Sapient, Gurgaon, India

June 2018 – July 2019

Associate Experience Technology Level 1

Grew from a junior-most developer on an e-commerce platform to the sole frontend owner of a fintech platform, contributing across UI teams, sprint planning, deployments, and CI/CD integration.

- Increased order creation by 10% by optimizing the add-to-bag flow and improving frontend reliability.
- Improved code maintainability by 30% through reusable React UI components and standardized frontend patterns.
- Eliminated a sprint's worth of technical debt through focused remediation, defect resolution, and performance optimization.

Additional Experience

Junior Associate Experience Technology, Publicis Sapient, Gurgaon, India, **January – June 2018**
Led a team of 4 on an industrial project, coordinating delivery targets and being selected as team lead by peers.

Web Development Intern, Free Doctor Helpline Private Limited, New Delhi, India, **June 2017 – July 2017**
Built an AngularJS appointment booking system, increasing booking success rate by 40%.

Education

Master of Science in Software Engineering **May 2021**
Arizona State University, Tempe, AZ
GPA: 3.93/4

Bachelor of Technology in Computer Science Engineering **July 2018**
Manipal University Jaipur, Jaipur, India
GPA 7.6/10

Academic Projects

Kid Investor, Spring 2021
Rolled out a React/Redux application, mentoring team members to ensure project completion and conducting customer feedback meetings to track progress updates.

Battleship Bot, Fall 2017
Researched algorithms for optimal shooting strategy and designed a probabilistic targeting algorithm, improving hit accuracy by 35%.
